EXPERIENCE

Software Engineering Intern Jan 2025 – May 2025
SoftClans Technologies *Nairobi, Kenya*

- Built frontend and backend features using Laravel and Sencha Ext JS for enterprise software systems.
- Developed a multilingual translation API enabling users to dynamically switch application languages.
- Contributed to feature implementation, debugging, and testing across the full development lifecycle.

IT and Software Engineer Intern May 2025 – Aug 2025
Swan Valley Group *Harare, Zimbabwe*

- Developed and maintained internal web applications and workflow automation tools to streamline business operations.
- Built Python automation scripts to process operational data and reduce manual effort across manufacturing workflows.
- Created Excel-based dashboards and reports to provide actionable insights and support data-driven decision-making.

Game Development and Software Development Intern Jun 2026 – Aug 2026
Global Origin *Remote*

- Tested and debugged mobile applications using Kotlin and React Native, identifying functional defects, usability issues, and edge cases.
- Executed functional, regression, and validation testing to verify fixes and improve application stability and reliability.
- Collaborated with developers to diagnose issues, validate solutions, and prevent recurring defects.

PROJECTS

Shona AI Translator

- Built a full-stack AI translation platform using FastAPI, Next.js, Python, and Hugging Face NLLB to translate between English and Shona.
- Integrated a machine-learning translation model with a responsive web interface, connecting the frontend and backend through REST APIs.

Uber Clone

- Developed a full-stack ride-hailing platform using React, Laravel, MySQL, MapLibre, Geoapify, and PayPal.
- Implemented interactive maps, ride management, location-based functionality, and payment processing to replicate core rideshare workflows.

EyeScroll

- Built an Android accessibility application using Kotlin, Jetpack Compose, CameraX, and MediaPipe for real-time eye-gesture detection.
- Implemented blink and eye-gesture recognition to enable hands-free scrolling and device interaction.

SKILLS

Languages: JavaScript, TypeScript, Python, Java, Kotlin, PHP, SQL, C++, Rust

Frameworks and Libraries: React, Next.js, Node.js, Express.js, FastAPI, Laravel, React Native, PostgreSQL

Tools and Platforms: AWS, Docker, Git, GitHub, Linux, Redis, OpenCV, MediaPipe, OpenStreetMap, PayPal API

EDUCATION

St. Edward's University
Bachelor of Science in Computer Science (Honors). GPA: 4.0 / 4.0. *June 2029*
