## PROFESSIONAL SUMMARY

---

Computer Science student at St. Edward's University with a 4.0 GPA and hands-on experience building and shipping full-stack web and mobile applications. Proven ability to develop production-ready software across frontend and backend stacks, with real-world internship experience and independently launched projects reaching thousands of users.

## EDUCATION

---

### St. Edward's University

Bachelor of Science in Computer Science (Honors). GPA: 4.0 / 4.0.

Expected 2029

## EXPERIENCE

---

### Software Engineering Intern

Jan 2025 – May 2025

SoftClans Technologies

Nairobi, Kenya

- Developed frontend and backend features using Laravel and Sencha Ext JS for enterprise software systems.
- Built a multilingual translation API enabling users to dynamically switch application languages.
- Contributed to feature implementation, debugging, and testing across the full development lifecycle.

## PROJECTS

---

### AmericaBound

React, JavaScript

- Built and deployed a platform providing information about US universities and colleges to help international students search for a school.
- Released the initial mobile application on the Google Play Store, achieving 200+ downloads before expanding to a web platform.
- Grew the website to 3,000+ visits through user-focused design and content organization.

### Uber Clone

React, Laravel, OpenStreetMap, PayPal API

- Developed a full-stack ride-hailing application supporting ride booking, route visualization, and payment processing.
- Built RESTful backend services in Laravel to manage users, rides, and transaction workflows.

### NeuroRun: Gesture-Controlled AI Game

Python, OpenCV, MediaPipe, Pygame

- Developed a real-time gesture-controlled endless runner using Python, Pygame, OpenCV, and MediaPipe.
- Implemented hand tracking to replace traditional keyboard input with webcam-based gesture controls.
- Packaged and published the completed game with playable builds and project documentation on GitHub and itch.io.

## SKILLS

---

**Languages:** Python, JavaScript, Java, PHP, SQL, Rust

**Frameworks & Libraries:** React, Next.js, Node.js, Laravel, React Native

**Tools & Platforms:** OpenCV, MediaPipe, OpenStreetMap, PayPal API, Google Play Store
